Increasing the accessibility of ultrasound also brings benefits to the entire system through savings at imaging investigations costs level.

The EAES Technology committee introduced this course in its congress program as a tool for initiating and acquiring skills for interested surgeons, regardless of age.

At the EAES congresses in Frankfurt and London, as well as in two ARCE events in Bucharest, the course evolved from the single module format to the current one, prepared for Sevilla, with three modules: Abdominal, eFAST @ Trauma and Guiding Puncture.

The future module, Intraoperative Ultrasound, (with laparoscopic and open abdomen approach, on pigs under general anesthesia), will be ready for the ARCE Congress in Bucharest in November 2019.
