

Letter of introduction

I have had the absolute honour to serve the EAES first as Congress president in Stockholm 2008 and since then as Committee member, Treasurer and latest two years as Internal Auditor. The Association has over the years proven its legacy as a platform for innovative procedures with an impressive ability to attract key opinion leaders globally. I have also had the pleasure to be a part of the executive board during the implementation of a new and vivid strategic plan for the future. I would be grateful to run for a second period as Internal Auditor and promise to continue the work in the spirit of the new and promising agenda for the society contributing to compliance and structure.

Vote for me if you search for a highly-motivated, curious and results orientated professional within the Life-science sector, I have a proven track record of providing exemplary contributions in surgery, science and business as well as in entrepreneurial projects.

Currently well positioned within Life-science, where I can bring immediate and strategic value and develop current skillset further.

*Yours sincerely
Gunnar Ahlberg*
