

Grant	EAES Fellowship 2020 – 2021 program
Training period	01/10/2021- 31/12/2021
Final report date	06/03/2022
First + surname of fellow	Annalisa lo Conte
Host institution	Hospital Clínic Barcelona
Director	Prof. Antonio Lacy
Daily routines Surgical/clinical/research activities	Every day I joined to medical visit of the patients sottoposed to colorectal surgery. Sometimes I joined to the surgical team otherwise to the multidisciplinary meeting about colorectal cancer patients, carcinomatosis peritoneal and inflammatory bowel disease. I have cooperated with a research surgeon to a research activity and we are waiting for the publication of our article.
Experience	I learned more how to manage patients with colorectal advance disease, IBD topic and about HIPEC, a field in which I had no experience. It was a very usefull experience for my carrer.
Tasks	Partecipate to the patient visit in the morning and to the surgical theatre. Working in a publication about treatment of right colon cancer and CME.
Involvement	I was involved in the clinical and surgical activities every day. I had the possibility to cooperate in a research about treatment of right colon cancer and CME
Overall number & types of surgical procedures attended	I joined to 6 surgical procedures
Number of surgeries performed by the fellow	None
Number of surgeries attended as the first assistant	One
Number of surgeries attended as the second/third assistant	6-7
Number of surgeries attended as observer only (not scrubbed)	40-45
Specify approximately the number & types of procedures attended	Laparoscopic anterior rectum resection and transanal total mesolectal excision, laparotomy intestinal resection in a Crohn affected patient, laparotomy bowel resection for intestinal occlusion, laparoscopic total colectomy, laparotomy sigmoid resection with resection of iliac vessel, left ureter and reconstruction and pancreatoduodenectomy for a neoplasia of duodenum.

Conclusion	<p>This experience was very useful, I had the possibility to learn more about many topics of colorectal surgery. The multidisciplinary meetings permitted me to study in deep patients with complex disease and understand the best management according to international guidelines. In surgical theatre I had the possibility to see both laparoscopic and robotic procedure and match myself with a different view to work.</p>
