

Professor Yoav Mintz is an Associate Professor of Surgery at Hadassah- Hebrew University Medical Center and the Chairman of the EAES Technology Committee. In his clinical activities Prof. Mintz serves as the Director of the Division of Foregut Surgery in Hadassah performing laparoscopic, robotic and flexible endoscopy operations. As an internationally acclaimed expert and luminary in minimally invasive and robotic surgery, he serves as the Director of the Surgical Innovation and Technology Center where he focuses on the development of medical devices for advanced MIS procedures, as well as developing new surgical techniques, enabling less invasive procedures for the treatment of high profile diseases. Under his guidance several start-up companies have successfully developed innovative products, which following preclinical testing and initial human trials at Hadassah, are in use worldwide.
